

# 9. Creating Features

# Purpose

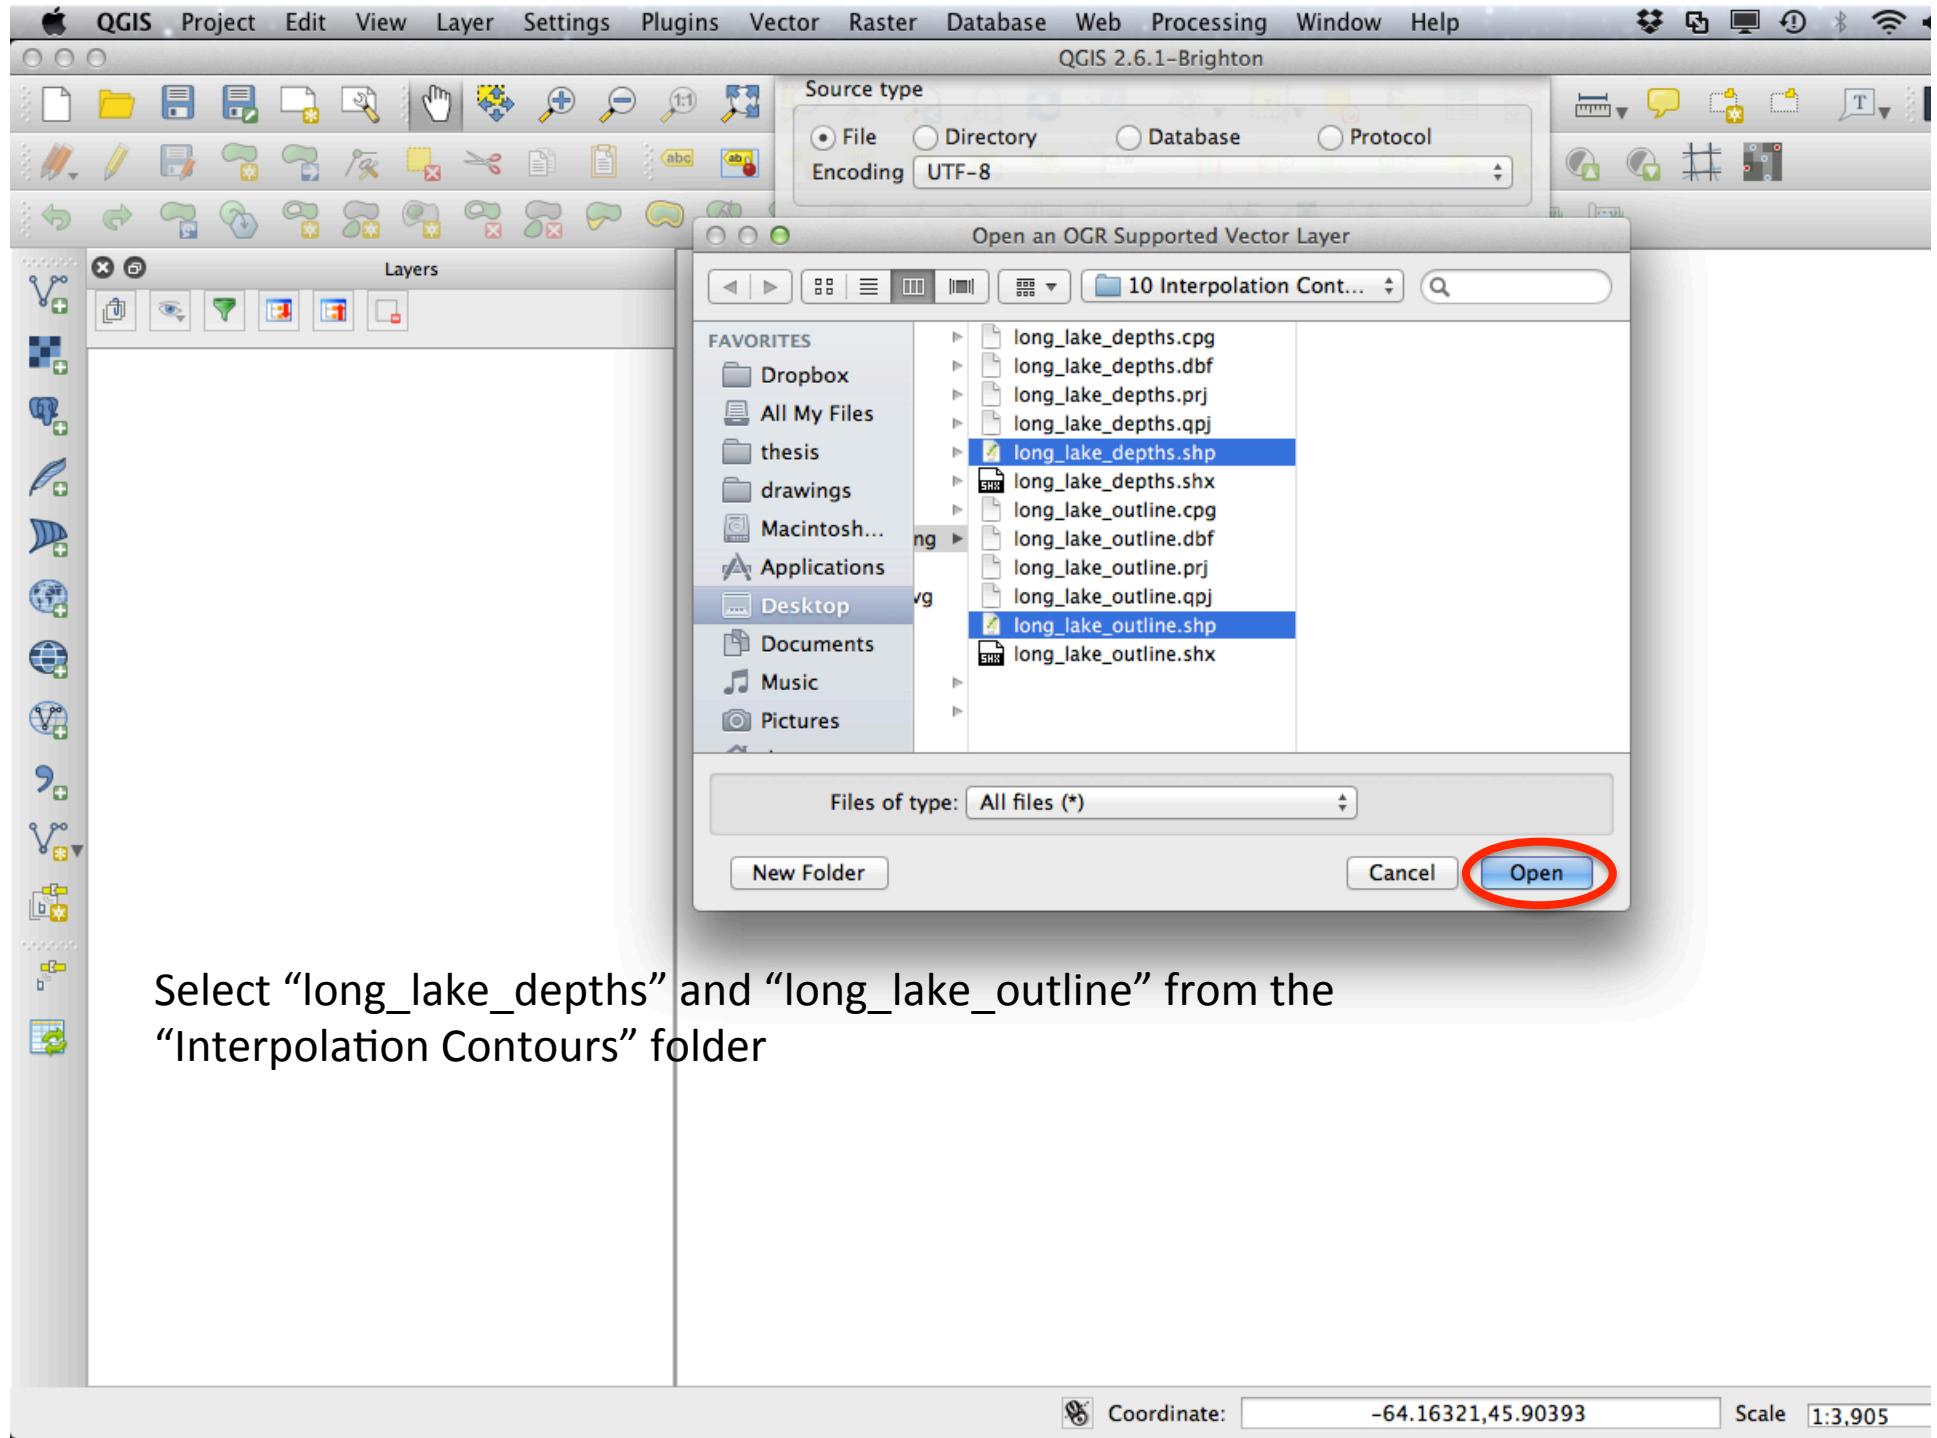

- Learn how to create and edit vector layers

# The Assignment

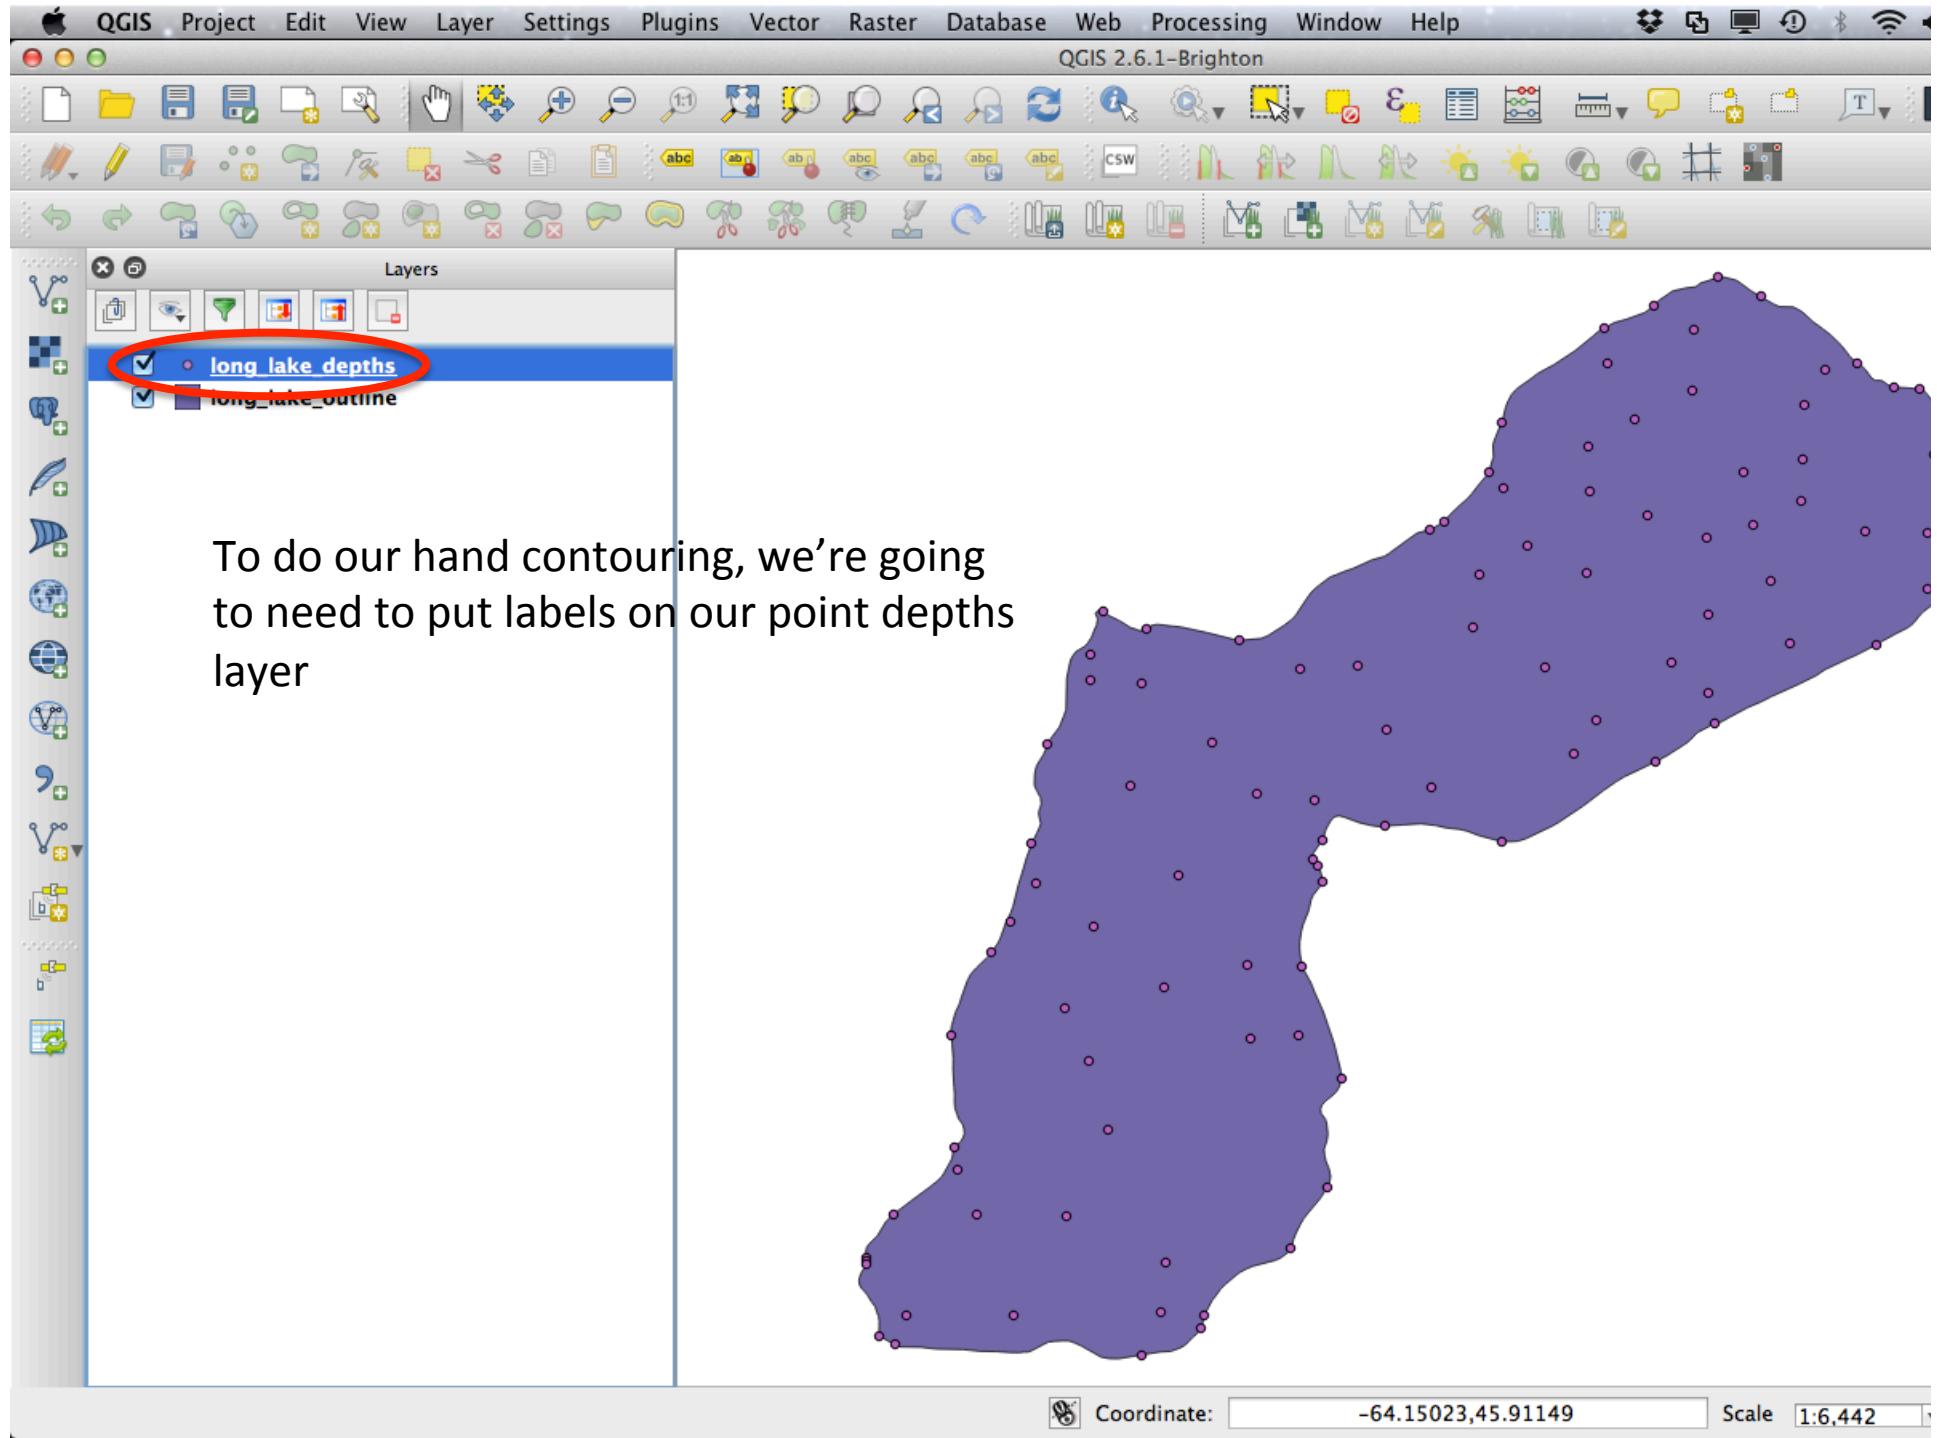

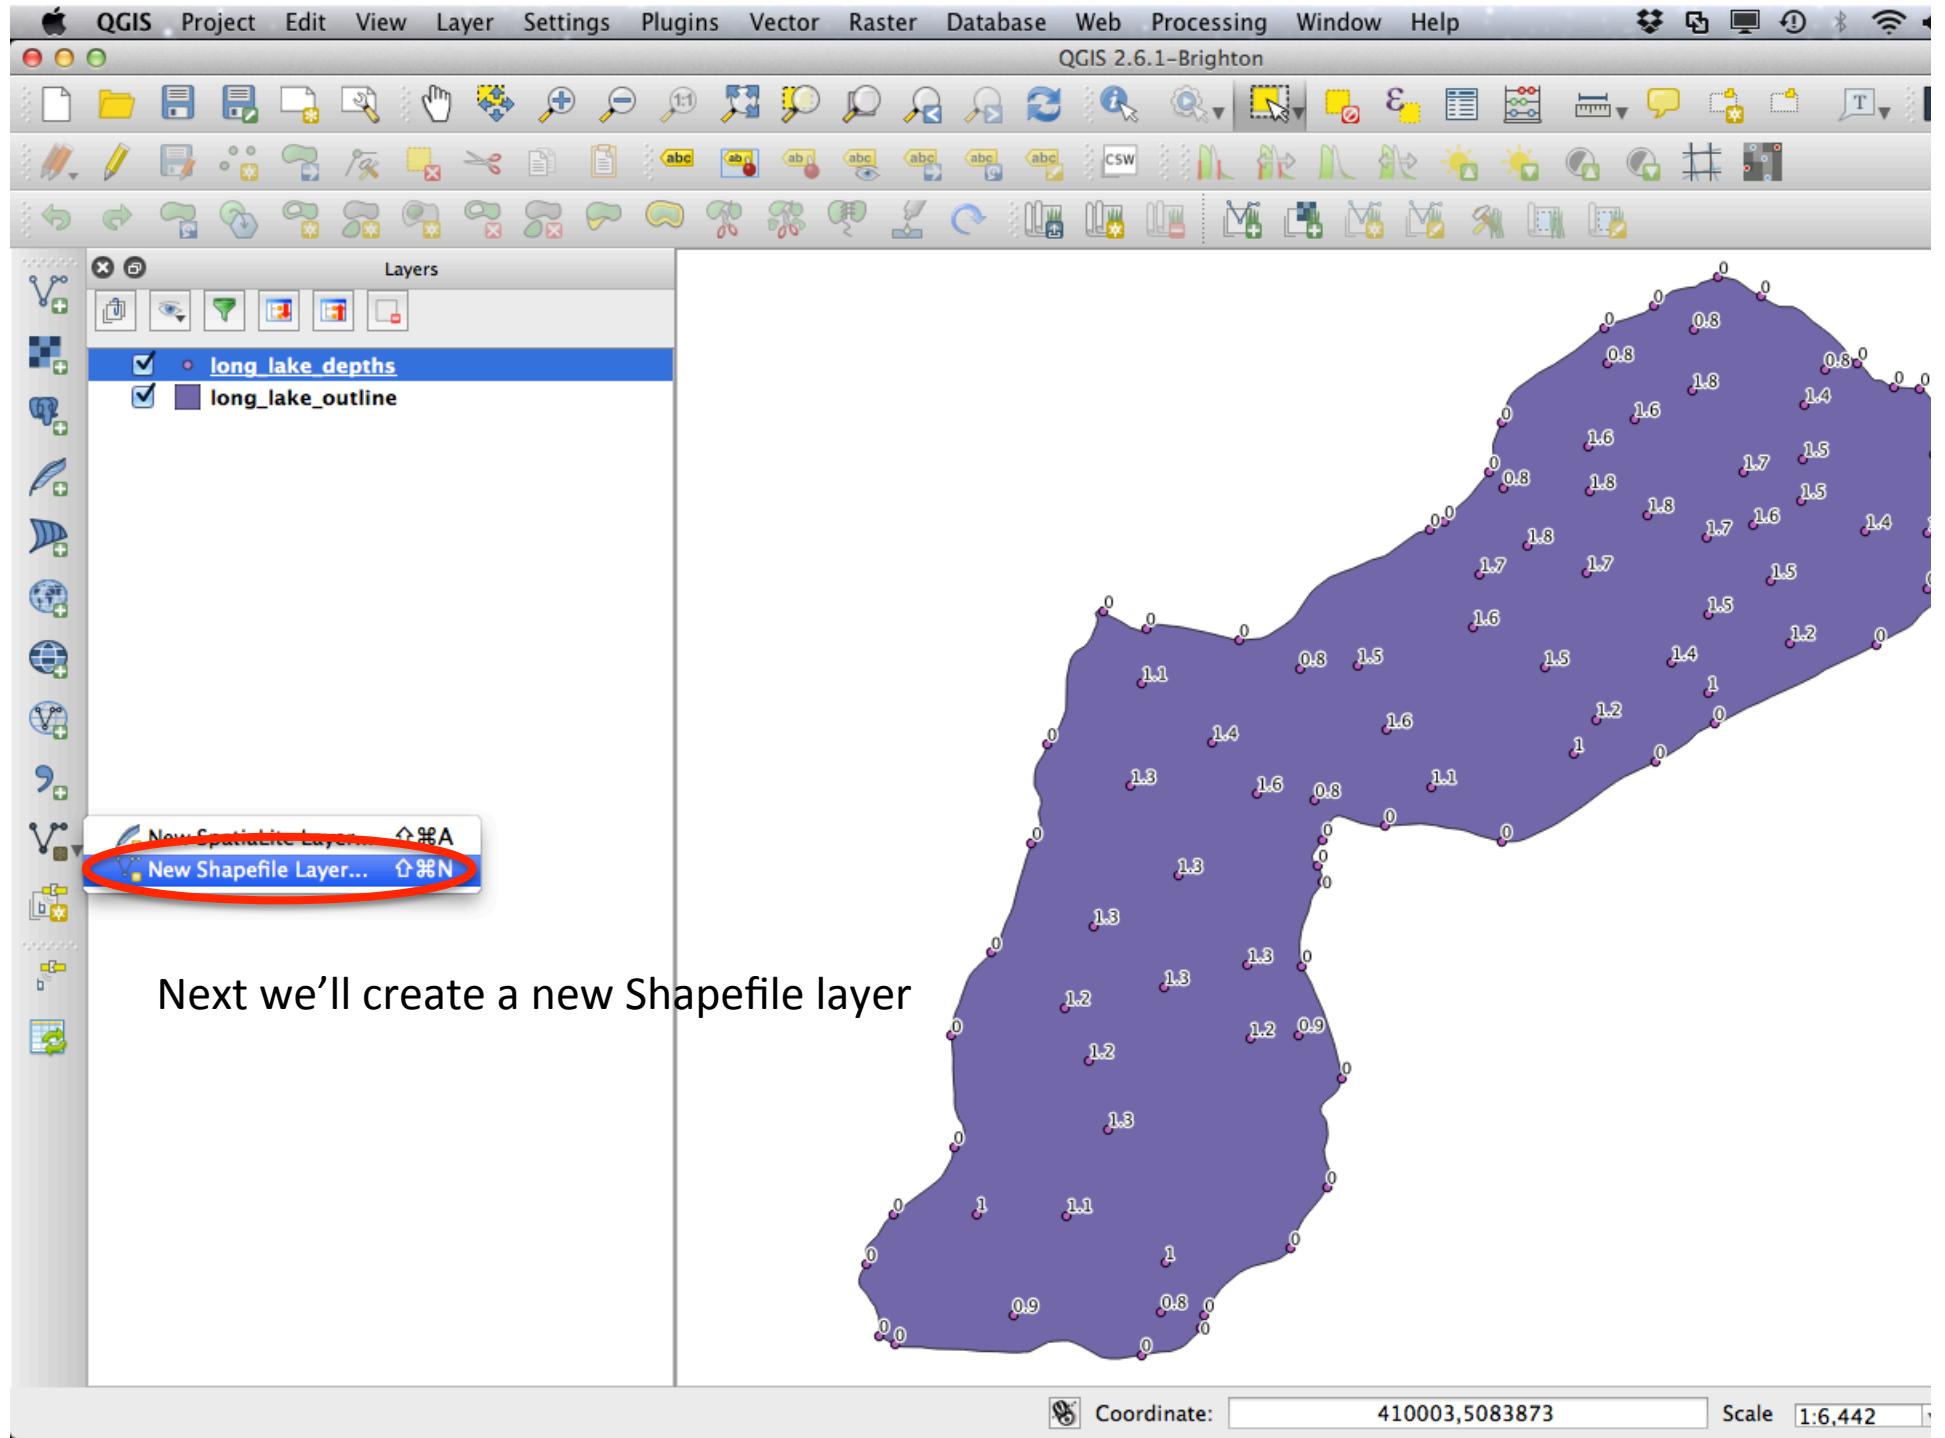

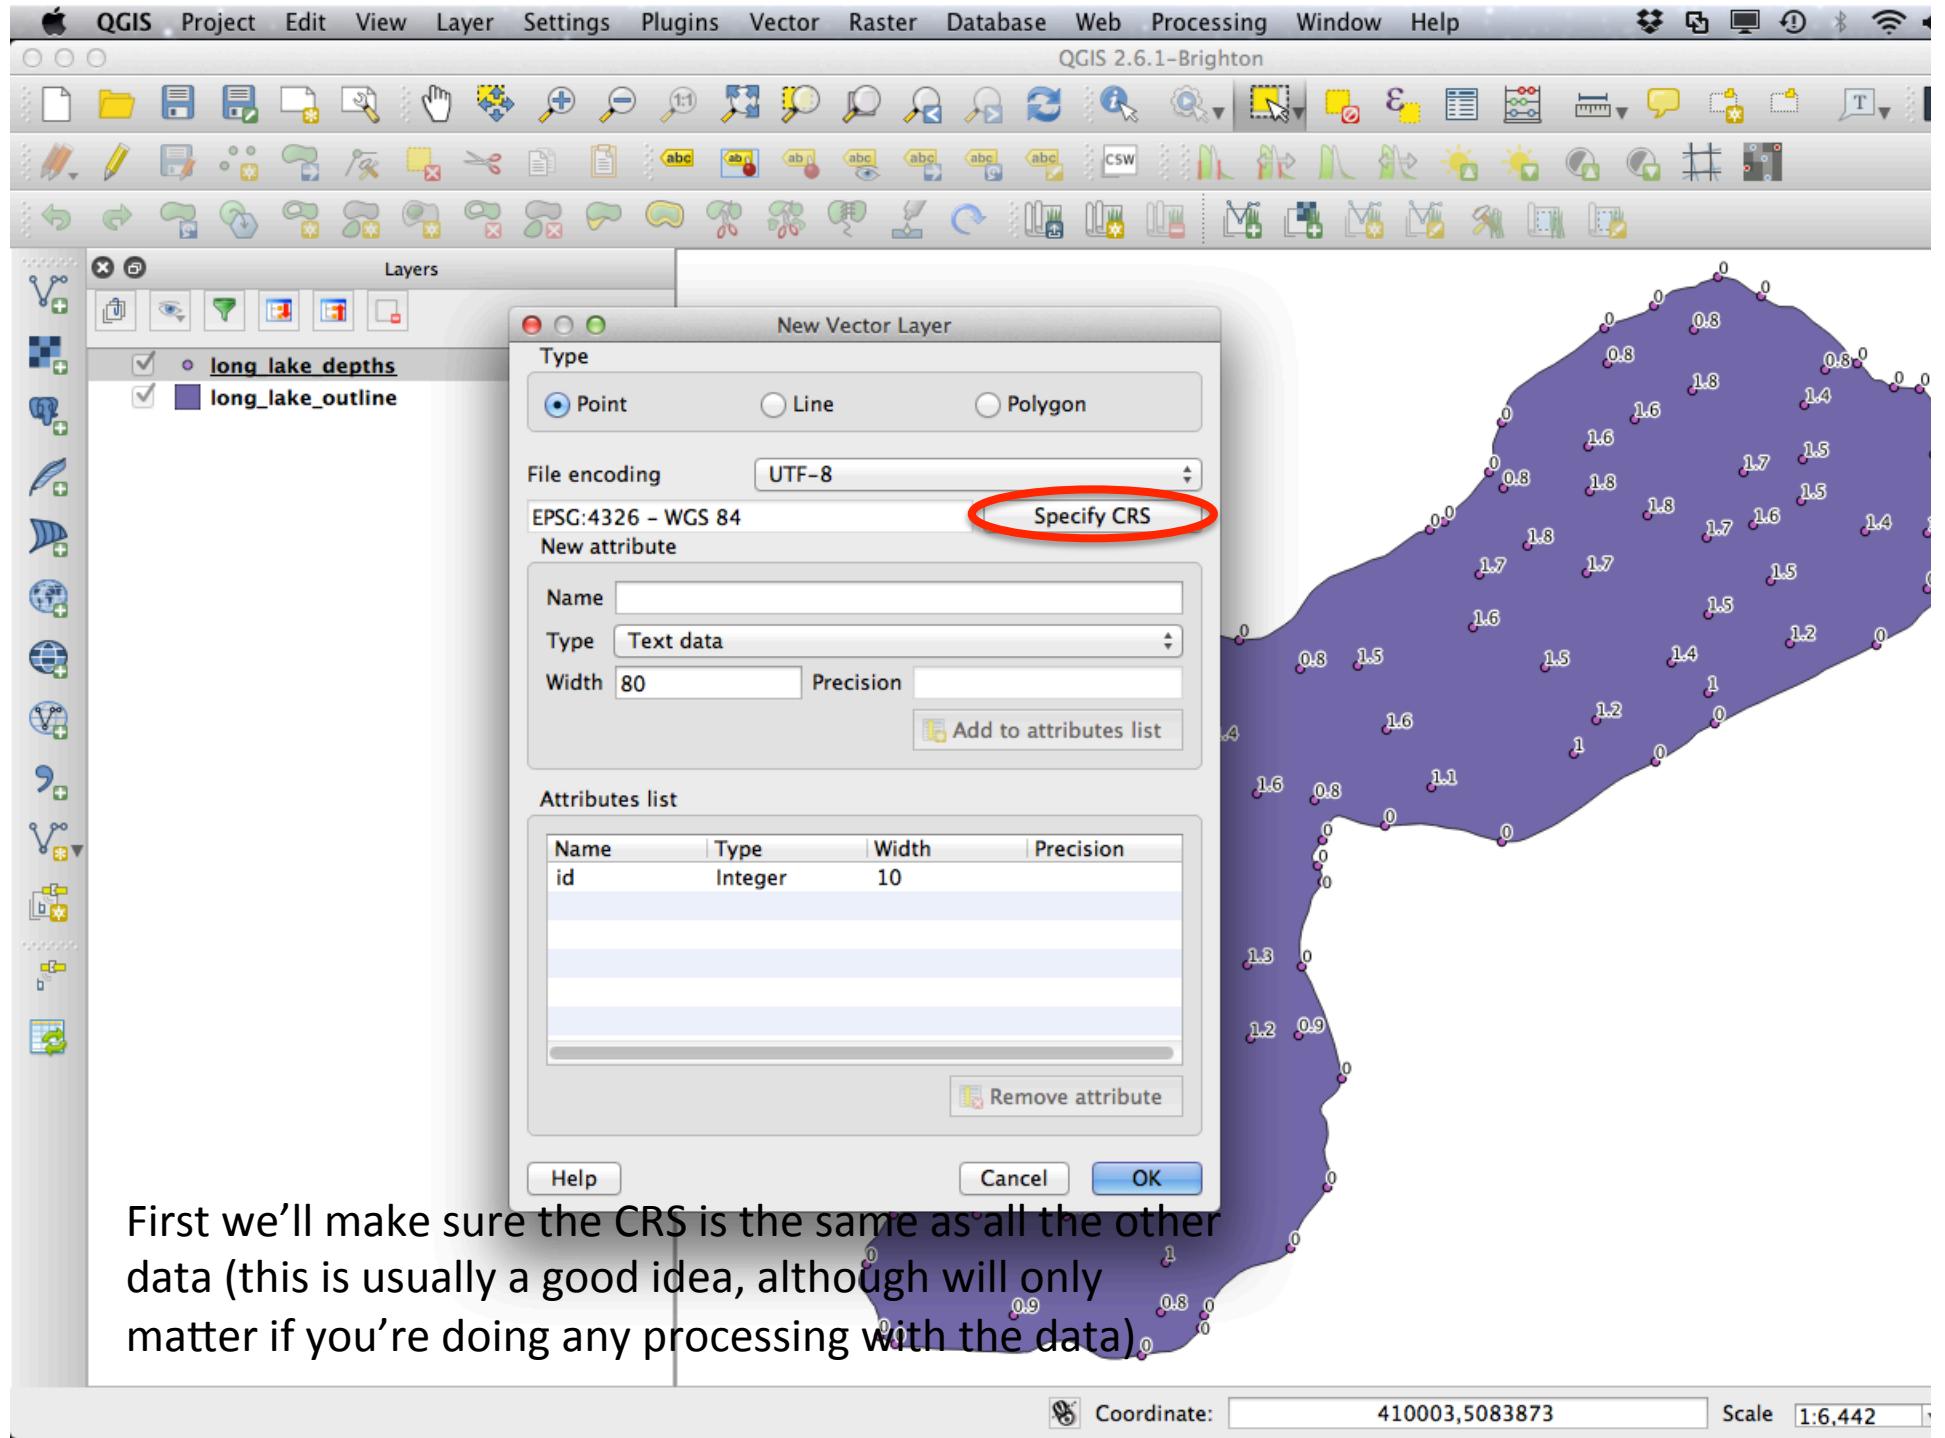

To start we'll need to add a few vector layers.

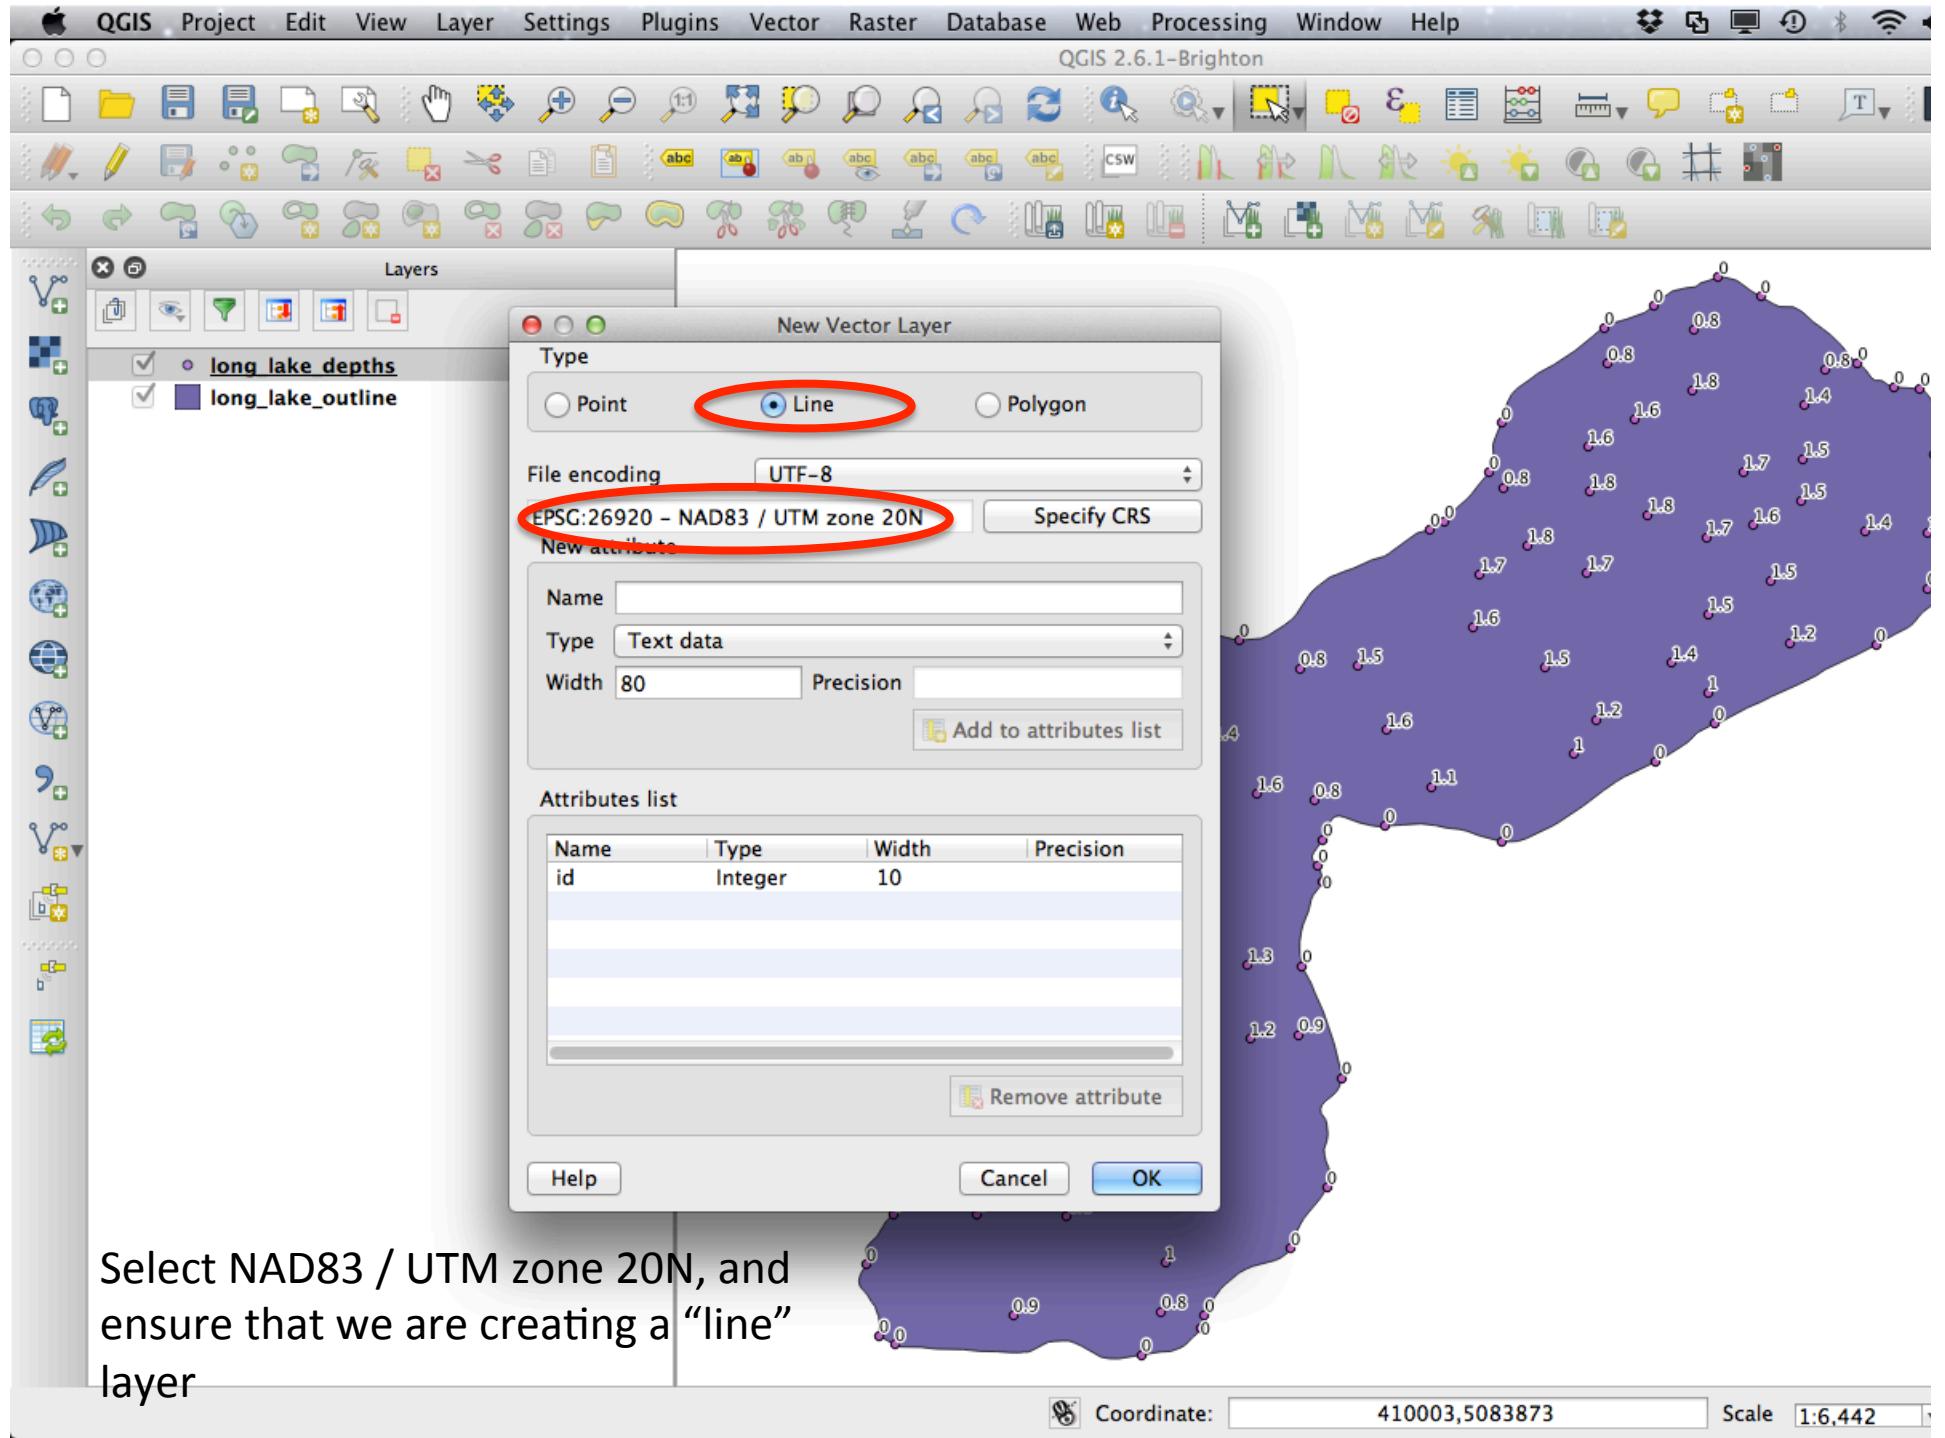

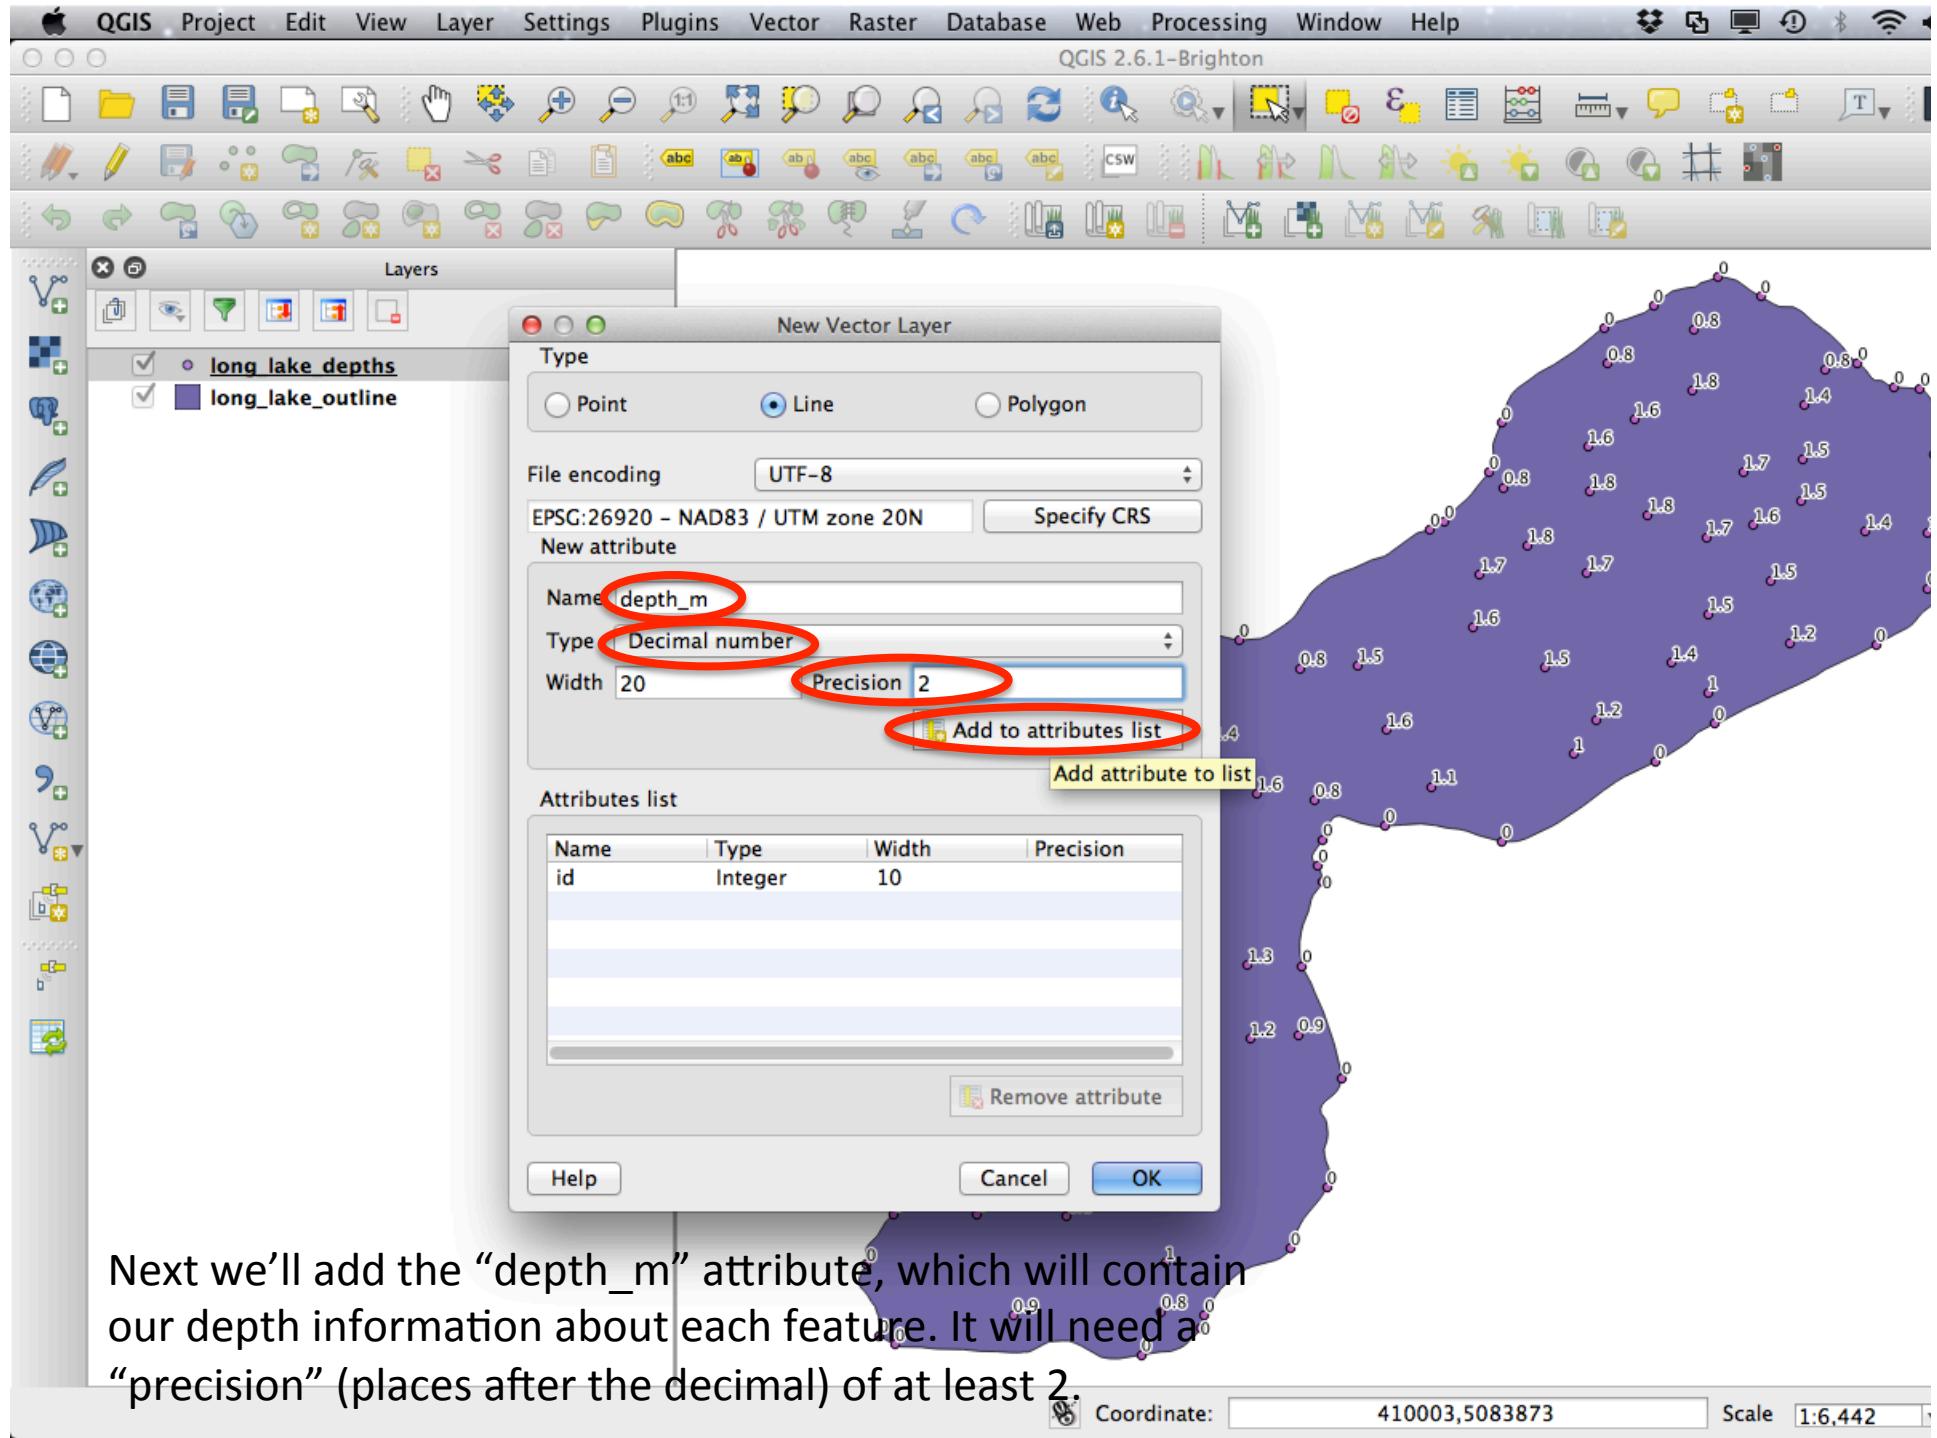

Select “long\_lake\_depths” and “long\_lake\_outline” from the “Interpolation Contours” folder

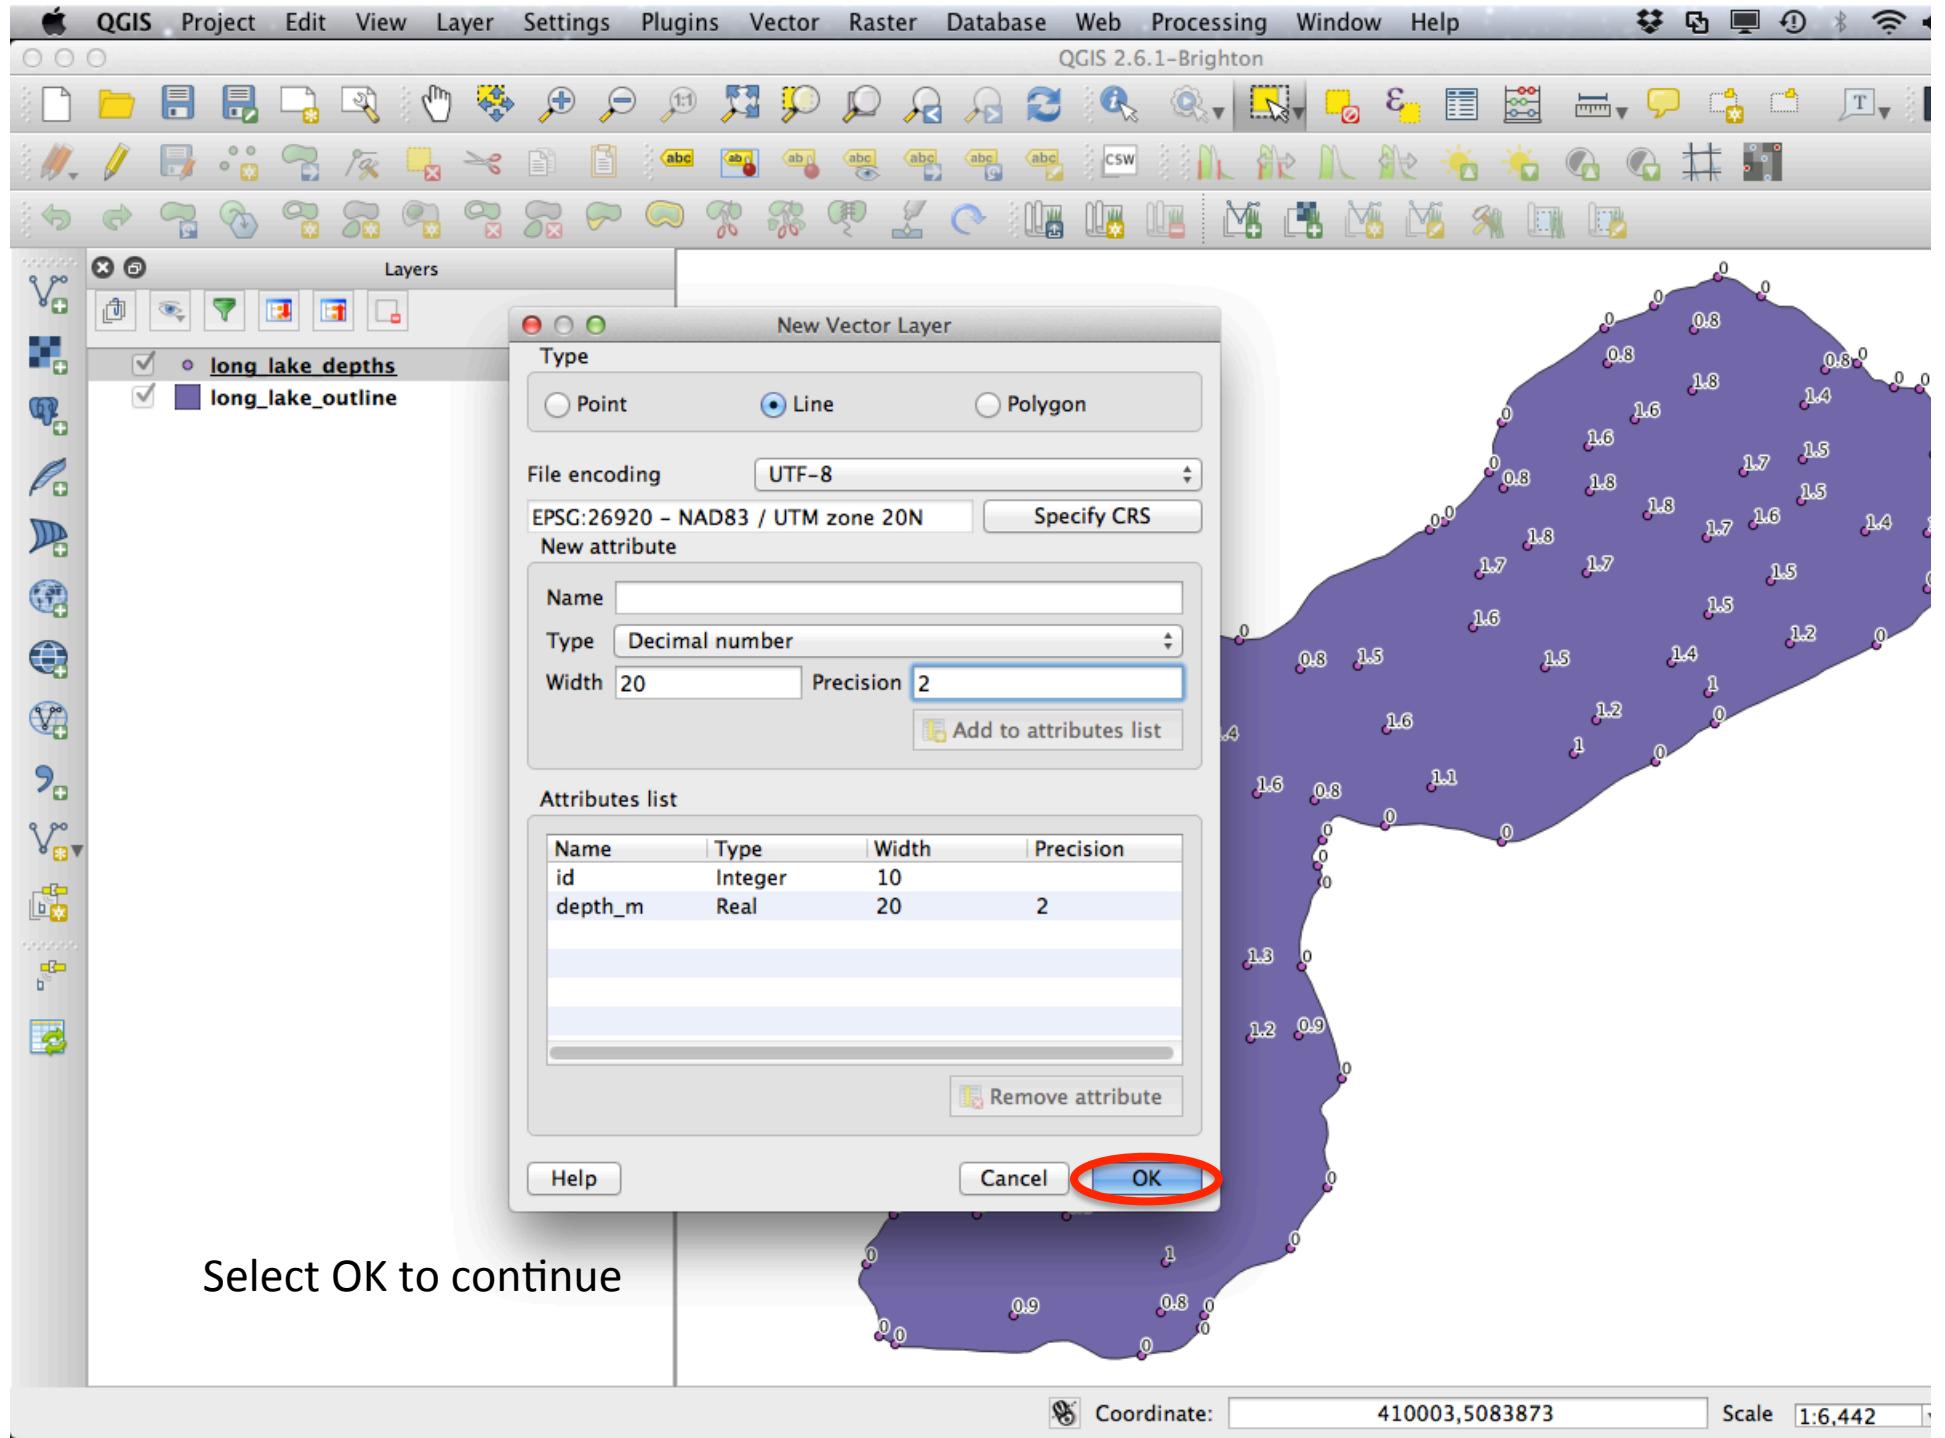

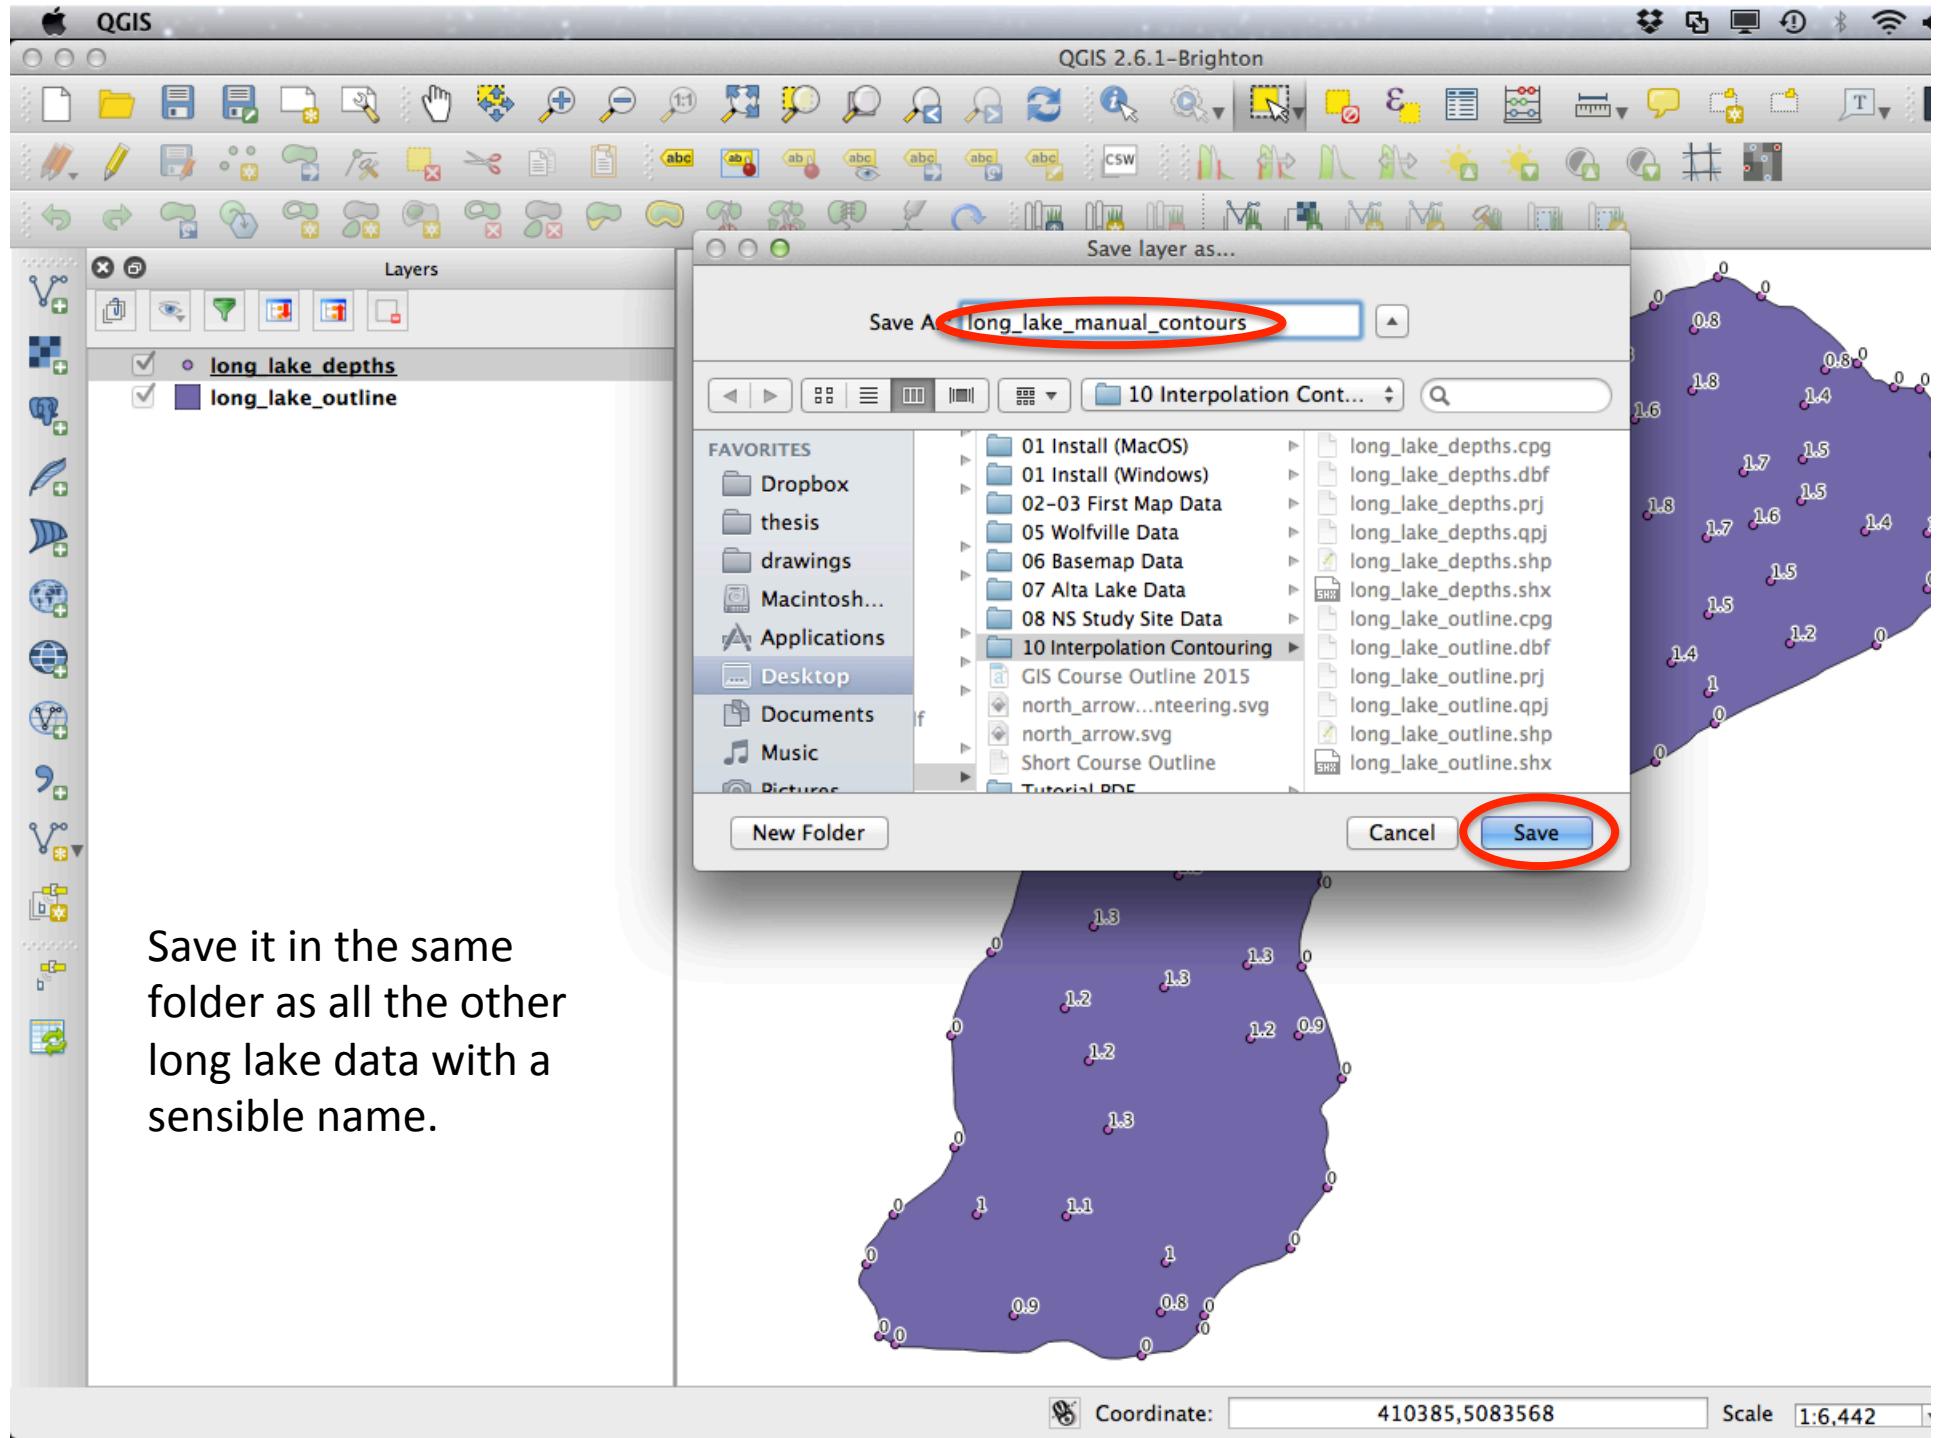

Select OK to continue

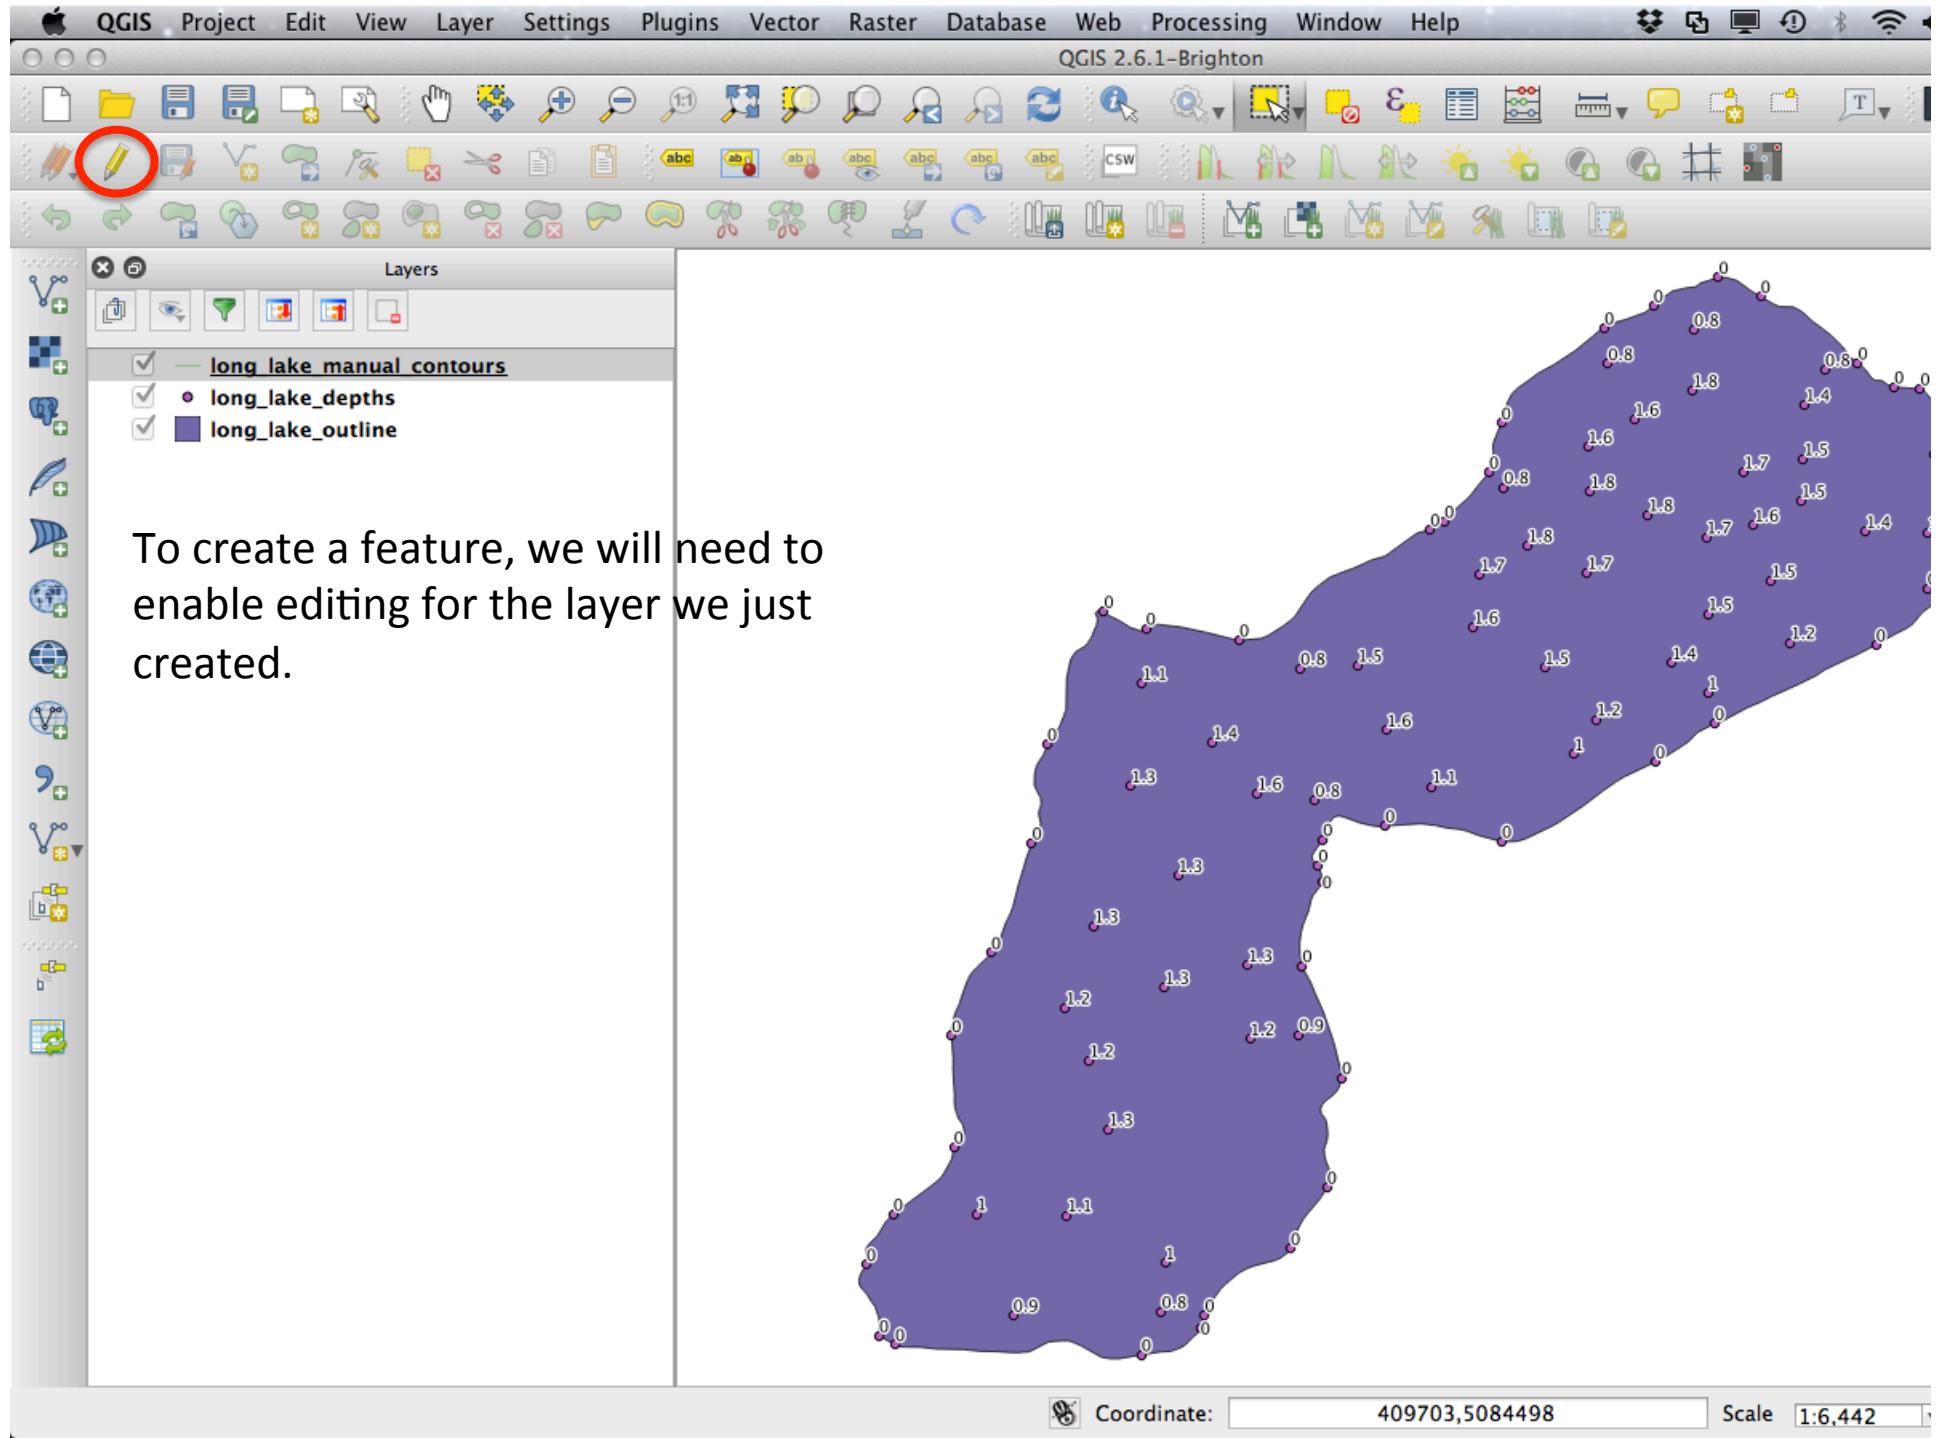

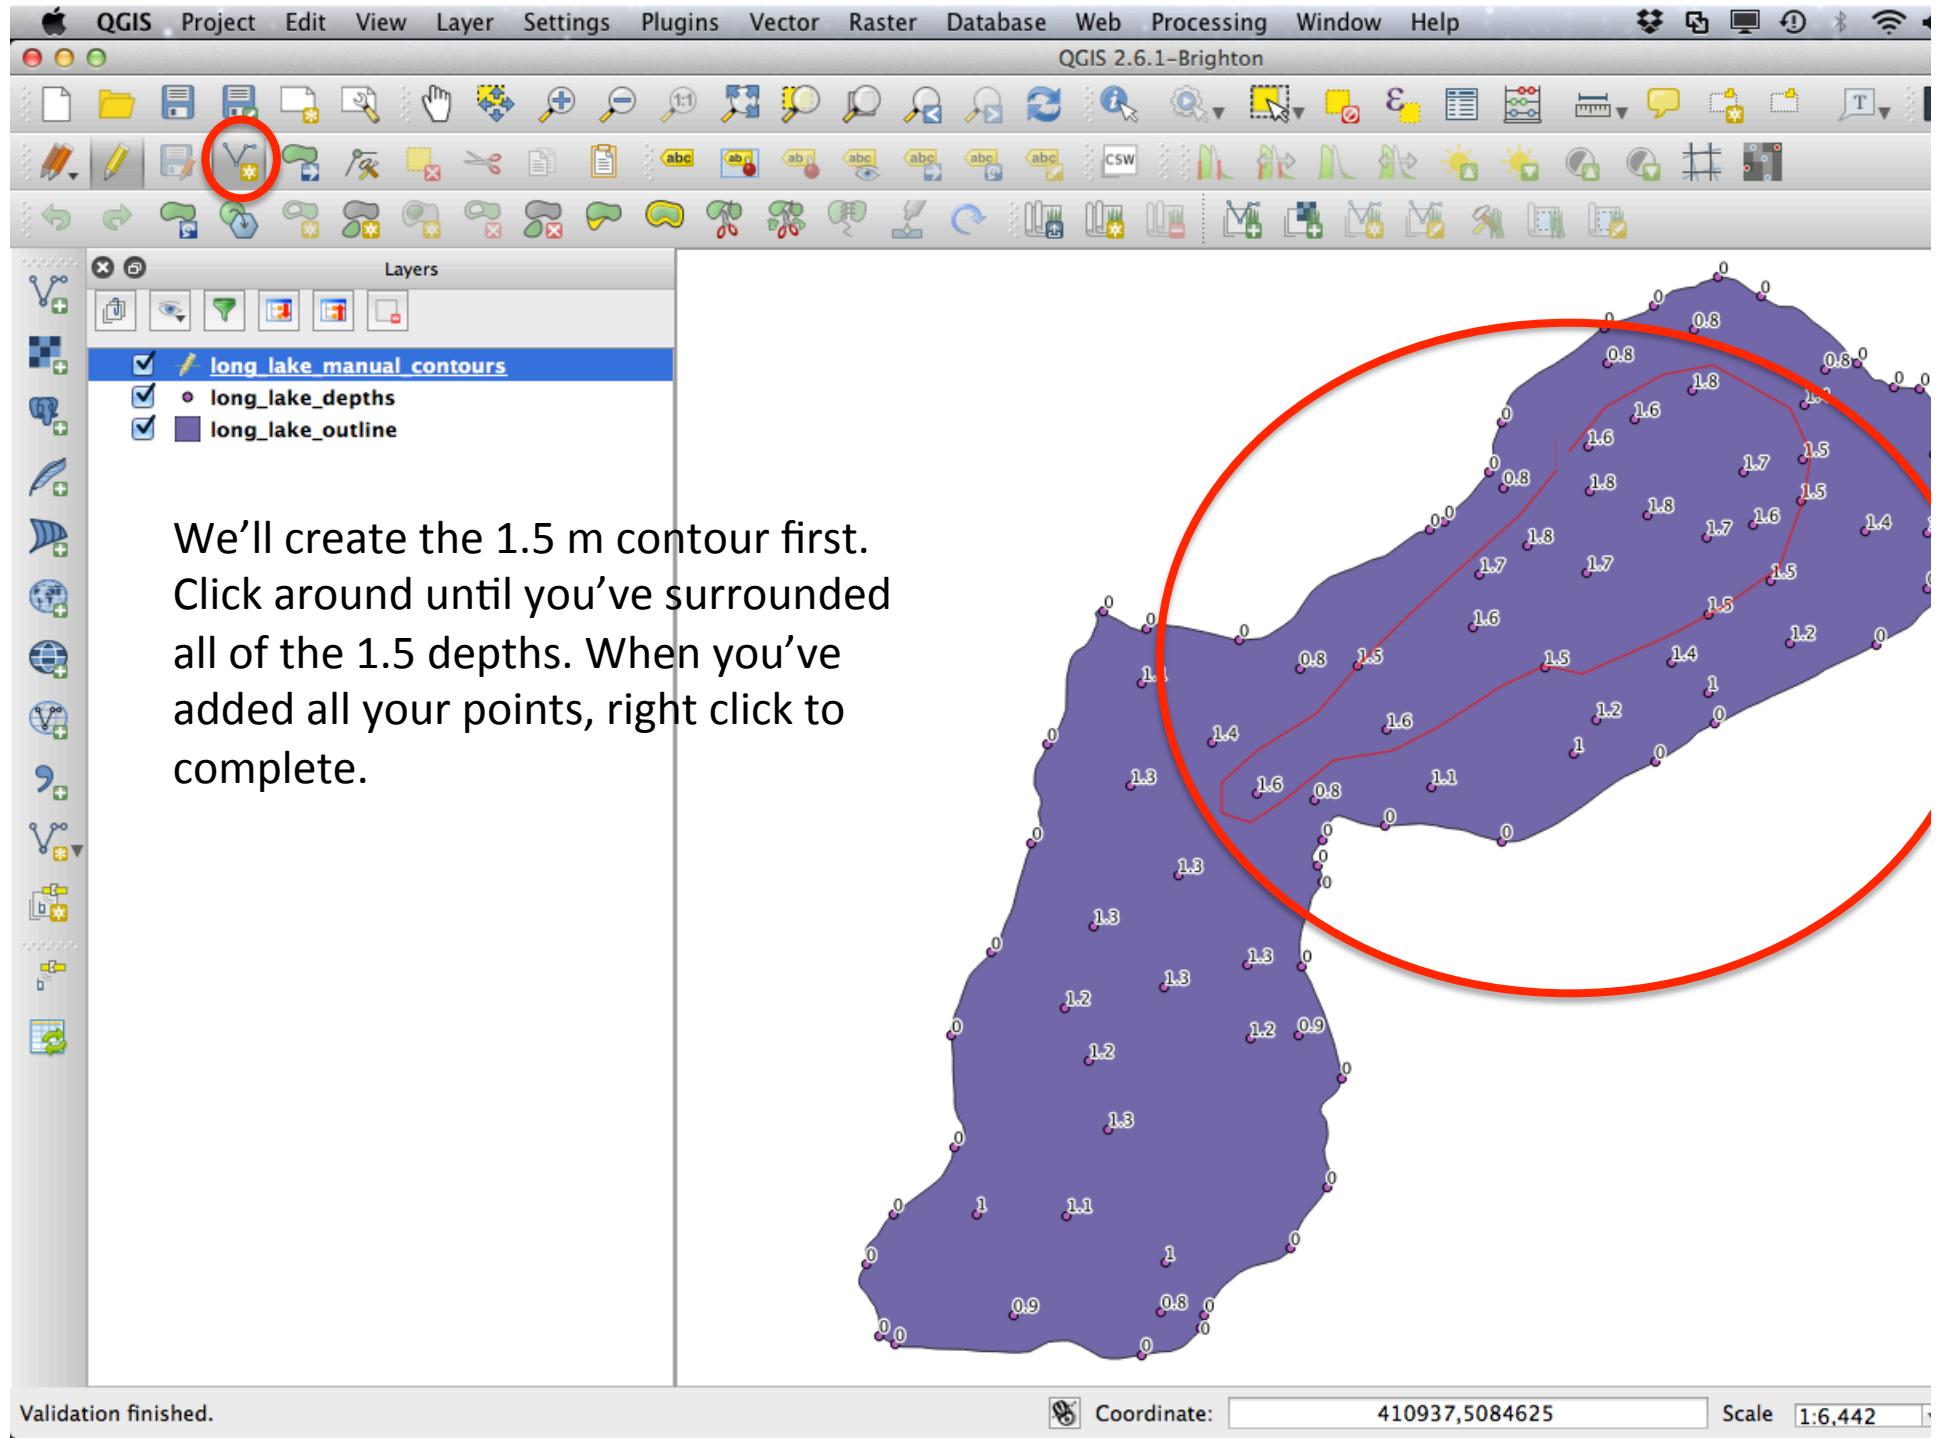

Coordinate:

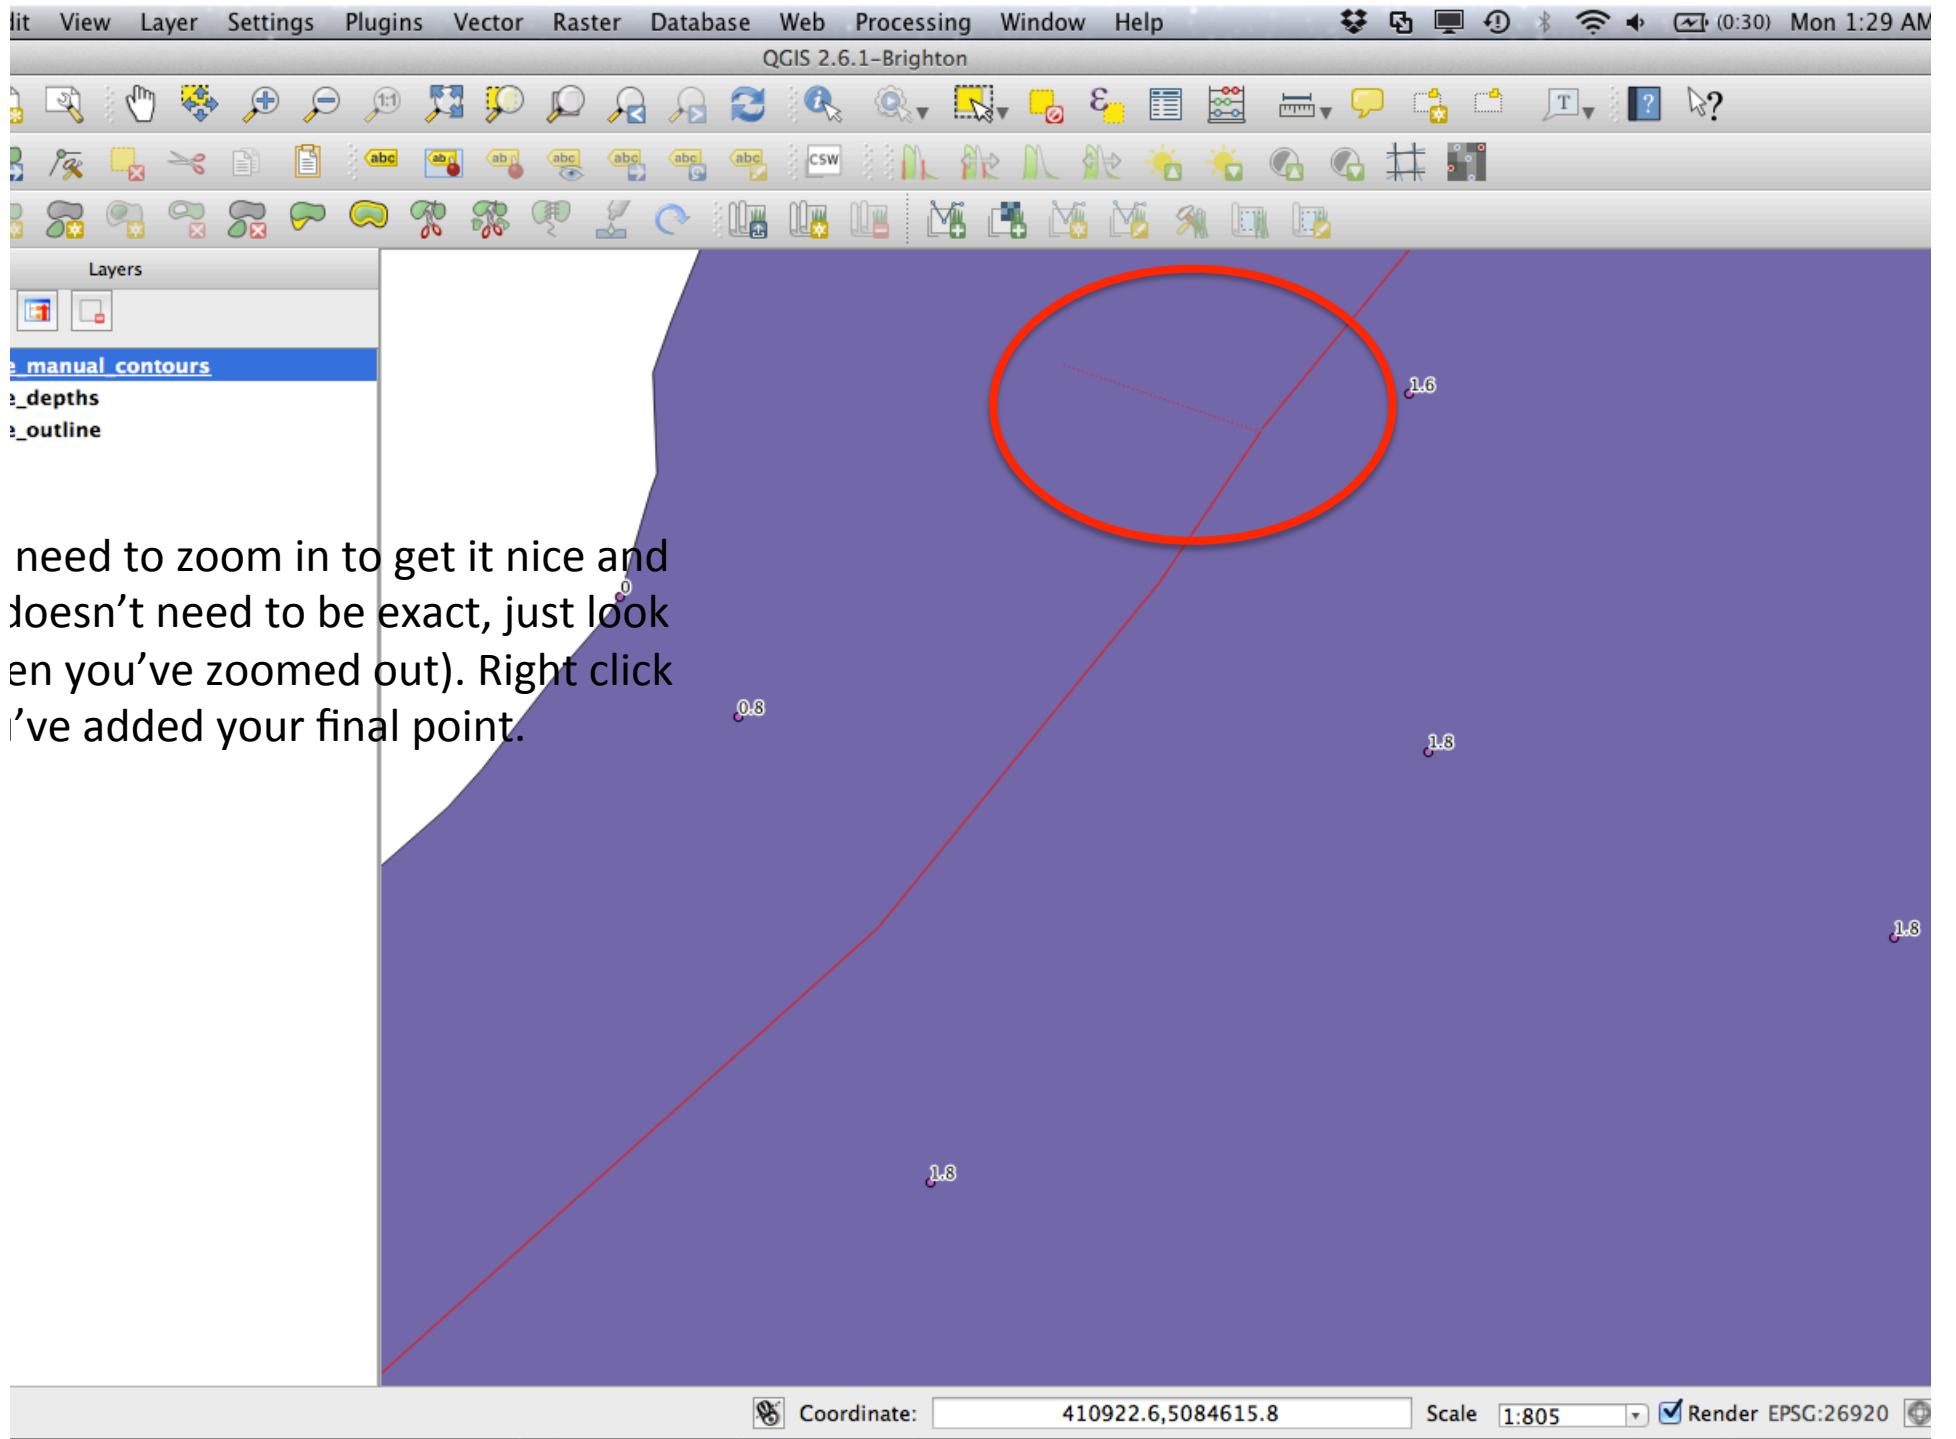

410003,5083873

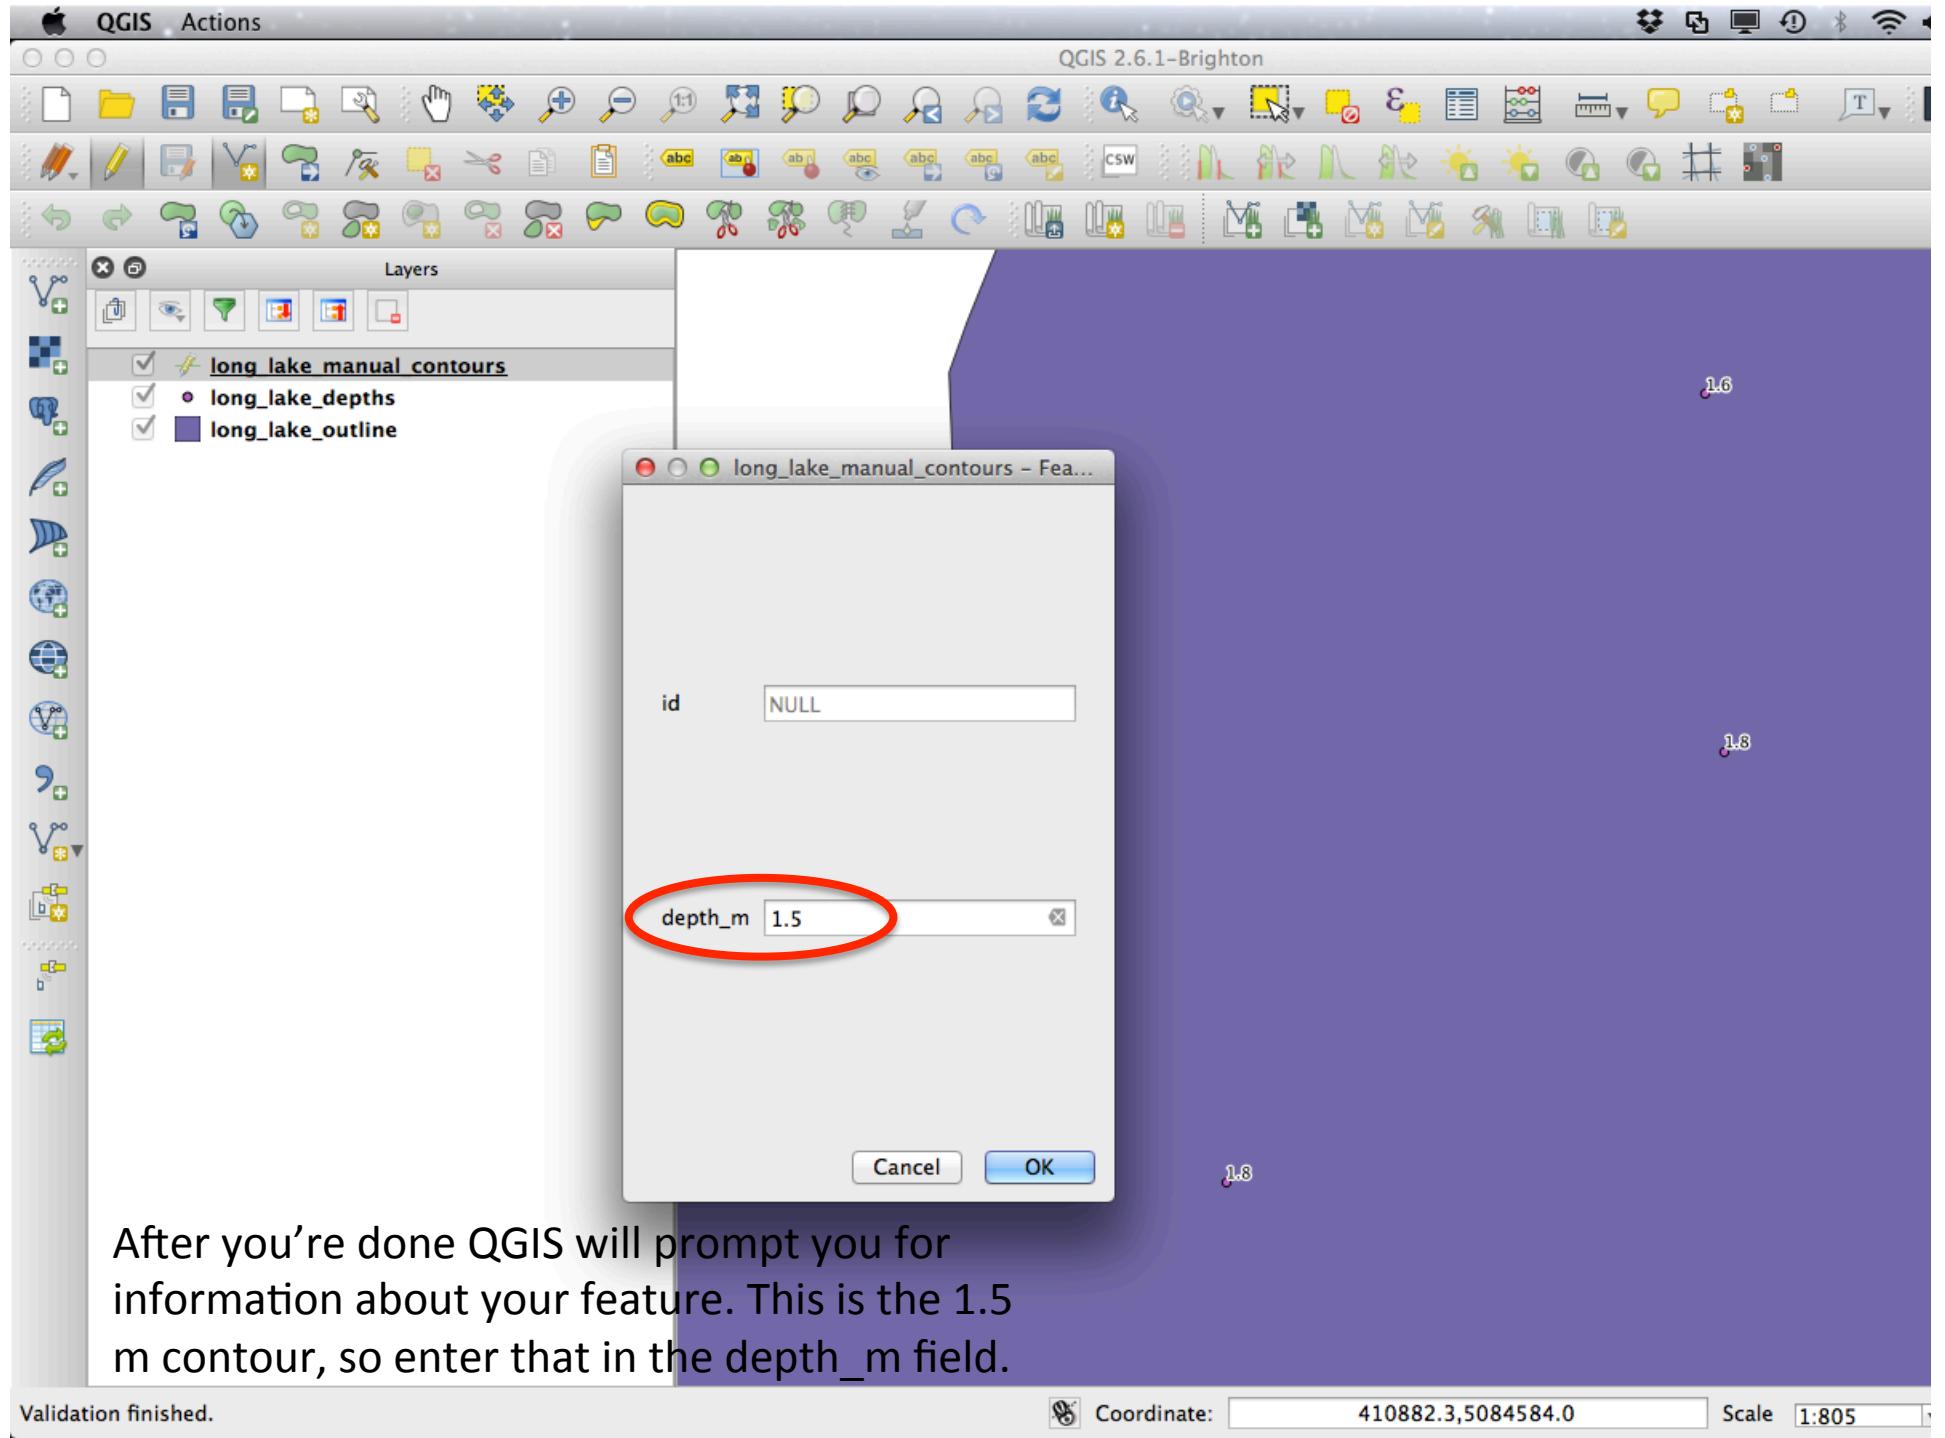

Scale 1:6,442

After you're done QGIS will prompt you for information about your feature. This is the 1.5 m contour, so enter that in the depth\_m field.

Validation finished.

Coordinate:

410882.3,5084584.0

Scale 1:805
